

Title: Nature

Author: sachin

Nature is very beautifull and it give us everything we need to live. The trees, flowers, rivers and mountains make our world more colorfull. Without nature, life will be very difficult and sad. Many people do not care about nature and they throw garbage in the rivers and cut down trees illegally.

Nature also provides us food, water and air. Birds sings in the morning and animals roam freely in the forest. The sun, moon and stars also makes the nature more amazing. We should protect nature and keep it clean because it is very important for our survival.

Nowadays, pollution and deforastation are big problems. If we do not stop pollute the enviroment, our future will be in danger. Every person should plant trees, save water and avoid using plastic. We should also take care of animals and birds because they are part of nature.

In conclusion, nature is a gift from god and we must love and protect it. If we keep nature safe, it will provide us a better life and happy world.
