

**Title:** Nature

**Author:** nijal

**Topic:** N/A

Nature is one of the most beautifull gift that the Earth has given to us, but many people dont realy stop to look at it carefuly. When we walk outside, sometimes we are to busy with our phones or our thoughts, and we forget how amazing the world around us actualy is. The trees are standing tall like old guardians, the birds sings their songs every morning, and the rivers keeps flowing no matter what happen.

In the forest, you can feel a kind of peace that is hard to find in the noisy city. The air feels more fresher and the sound of leafs moving in the wind makes you feel calm and relax. ANimals also live their, each one having their own small world and way of life. Many of them depends on the forest to survive, but sadly humans destroy many habitats for building or farming.

Nature also teach us important lesson. It shows that everything is connected together. When one plant or animal disappear, it can effect many other things in the enviroment. This is why it is important that we protect nature and take care of the planet. If we dont, the future generations might not get to see the same beauty that we see today.

Even a simple sunset can make a person feel awsome and inspire many thoughts. The sky change colors from orange to pink to purple, reminding us that everyday can end in a beautiful way even if it was hard. Nature is not just something outside, it is part of our lifes and we should apreciate it more.
